Note to Editors: Further information can be found on the internet site: www.pheur.org.

5TH EDITION EUROPEAN PHARMACOPOEIA IN SPANISH NOW AVAILABLE

The European Directorate for the Quality of Medicines (EDQM) is pleased to announce that it will launch a new version of the European Pharmacopoeia, a Spanish online version. The first two volumes 5.0 will be available in July. They will be followed by supplements 5.1 to 5.3 in August.

The EDQM is committed to keeping pace with its users needs and to utilising the most current technologies to allow access to the European Pharmacopoeia, a single reference work for the quality control of medicines and substances for pharmaceutical use. This, the first Spanish online version of the European Pharmacopoeia, will make it easier for Spanish-speaking users to use, understand and meet the requirements of the European Pharmacopoeia, and will serve to improve and promote public health worldwide.

The work, which began the end of 2005 in liaison with the Spanish Medicines Agency, was managed by a dedicated team within the EDQM and used the latest IT tools available to translate, format and validate the accuracy of all the texts. The features of this version are the same as the English or French online version.

If you already hold a subscription to the 5th Edition European Pharmacopoeia online version (English or French), you will automatically be granted free access to the Spanish online version, as well as access to our technical support service. If not but you are interested in ordering, you can do so through your local distributor or directly from the EDQM.

For more information on our publications and pricing is available on our website: http://www.pheur.org/site/page_581.php and <https://book.pheur.org>

A political organisation set up in 1949, the Council of Europe works to promote democracy and human rights continent-wide. It also develops common responses to social, cultural and legal challenges in its 46 member states.
