# PHARMEUROPA BIO 2007-1

## — CONTENTS —

Biological Activity of EDQM CRS for Interferon Alfa-2a and Interferon Alfa-2b - Assessment in two <i>in vitro</i> Bioassays M.M.C.G. Silva, R.E. Gaines-Das, C. Jones, C.J. Robinson.....	1
Collaborative Study for the Establishment of a Candidate Equine Influenza Subtype 2 American-like Strain A/EQ/South Africa/4/03 - Horse Antiserum Biological Reference Preparation Janet Daly, A. Daas, M-E. Behr-Gross .....	7
Pre-validation Study for Testing of Avian Viral Vaccines for Extraneous Agents by PCR L. Bruckner, H.P. Ottiger.....	15
Establishment of a Replacement Batch for Heparin Sodium Biological Reference Preparation M-E. Behr-Gross, A. Daas.....	19
Establishment of Replacement Batches for <i>Heparin Low-Molecular-Mass for Calibration CRS</i> , and the International Standard Low Molecular Weight Heparin for Calibration B. Mulloy, A. Heath, M-E. Behr-Gross.....	29
Collaborative Study for the Establishment of Erythropoietin BRP Batch 3 M-E. Behr-Gross, A. Daas, C. Burns, A.F. Bristow .....	49

### Corrigendum

to *Pharmeuropa Bio 2006-1* page 45 lines 15-18

*Please read*

**The table shows clearly that the 3 samples tested are virtually equivalent with respect to relative retention times, with mean ratio values of 0.850, 0.850 and 0.849 for Sample A, B and C respectively.**

*instead of*

**The table shows clearly that the 3 samples tested are virtually equivalent with respect to relative retention times, with mean ratio values of 0.850, 0.850 and 0.845 for Sample A, B and C respectively.**
