<b>Date of first adoption</b>	June 2008
<b>Date of original entry into force</b>	June 2008
<b>Date of entry into force of revised document</b>	July 2017
<b>Previous titles/other references</b>	This document replaces document PA/PH/OMCL (08) 04 19R
<b>Custodian Organisation</b>	The present document was elaborated by the OMCL Network / EDQM of the Council of Europe
<b>Concerned Network</b>	GEON

**Annex 4 to General European OMCL Network (GEON)**  
**Terms of Reference:**  
**Questionnaire to query the Official Medicines Control Laboratory (OMCL) Status of applicants to and members of the GEON**

**Introduction to the questionnaire**

The present questionnaire, which is in line with the core document of the General European OMCL Network, “GEON: Terms of Reference”, current version and its annexes should be used as follows:

- 1) **For applicants** to the Network it should be filled in by the applicant at the time of application and forms part of the supportive documents, which are evaluated by the Advisory Group GEON (AdG-GEON) and the European Directorate for the Quality of Medicines & HealthCare (EDQM) Secretariat; thus the questionnaire is a pre-requisite for accomplishing membership to the GEON.
- 2) **All members of the Network** should issue an OMCL status declaration at least once every 3 years by filling in the template reproduced on page 11 of this document. A new declaration campaign is initiated by the Secretariat who will launch an official email request to the GEON contact points. The OMCLs are responsible for placing the completed declaration in the document section of the OMCL inventory database. Significant changes since the last declaration (e.g. essential changes of the organisational structure, changes in the mandate of the OMCL) should be listed in key words in the respective box. The responsible person in the OMCL confirms the validity of the content by signing the statement. In addition, crucial changes have to be communicated immediately to the Secretariat without waiting for the next campaign and should be accompanied by supportive documents, where applicable. The information in the OMCL inventory database should be aligned with these changes.
