**FRAMEWORK RESOLUTION RESAP (2004) 1 ON COATINGS
INTENDED TO COME INTO CONTACT WITH FOODSTUFFS**

**FRAMEWORK RESOLUTION RESAP (2004) 1 ON COATINGS
INTENDED TO COME INTO CONTACT WITH FOODSTUFFS**

(Adopted by the Committee of Ministers

on 1st December 2004 at the 907th meeting of the Ministers' Deputies)

(Superseding Resolution AP (96) 5)

The Committee of Ministers, in its composition restricted to the Representatives of Austria, Belgium, Cyprus, Denmark, Finland, France, Germany, Ireland, Italy, Luxembourg, The Netherlands, Norway, Portugal, Slovenia, Spain, Sweden, Switzerland and the United Kingdom, member states of the Partial Agreement in the Social and Public Health Field,

Recalling Resolution (59) 23 of 16 November 1959, concerning the extension of the activities of the Council of Europe in the social and cultural fields;

Having regard to Resolution (96) 35 of 2 October 1996, whereby it revised the structures of the Partial Agreement and resolved to continue, on the basis of revised rules replacing those set out in Resolution (59) 23, the activities hitherto carried out and developed by virtue of that resolution; these being aimed in particular at:

a. raising the level of health protection of consumers in its widest sense: constant contribution to harmonising – in the field of products having a direct or indirect impact on the human food chain as well as in the field of pesticides, pharmaceuticals and cosmetics – legislation, regulations and practices governing, on the one hand, quality, efficiency and safety controls for products and, on the other hand, the safe use of toxic or noxious products;

b. integrating people with disabilities into the community: defining – and contributing to its implementation at European level – a model coherent policy for people with disabilities, which takes account simultaneously of the principles of full citizenship and independent living; contributing to the elimination of barriers to integration, whatever their nature, whether psychological, educational, family-related, cultural, social, professional, financial or architectural;

Having regard to the action carried out for several years for the purposes of harmonising their legislation in the public health field and, in particular, with regard to materials and articles intended to come into contact with foodstuffs;

Considering that coatings intended to come into contact with foodstuffs may, through migration of constituents to the foodstuffs, pose under certain conditions a risk to human health;

Noting that certain issues expressed in general terms in the Appendix to the present framework resolution need further analysis, input from other scientific projects currently carried out and appropriate innovative solutions;

Taking the view that each member state, faced with the need to introduce regulations governing this matter, would find it beneficial to harmonise such regulations at European level,

Recommends to the governments of the member states of the Partial Agreement in the Social and Public Health field to take into account in their national laws and regulations on coatings intended to come into contact with foodstuffs the principles set out hereafter.

**APPENDIX TO
FRAMEWORK RESOLUTION RESAP (2004) 1 ON COATINGS
INTENDED TO COME INTO CONTACT WITH FOODSTUFFS**

1. Field of application

Framework Resolution ResAP (2004) 1 on coatings intended to come into contact with foodstuffs applies to coatings which in the finished state are intended to come into contact or which are brought into contact with foodstuffs and are designed for that purpose. The following types of coating are covered:

- a) Coatings for metal packaging;
- b) Flexible packaging coatings;
- c) Heavy-duty coatings.

2. Definition

For the purpose of the framework resolution, “coatings” mean the finished material prepared mainly from organic materials applied to form a layer/film on a substrate in such a way as to create a protective layer and/or to impart technical performance.

3. Specifications

Coatings used for food contact applications under normal or foreseeable conditions of use should meet the following conditions:

3.1. they should not transfer their constituents to foodstuffs in quantities, which could endanger human health, bring about an unacceptable change in the composition of the foodstuffs or a deterioration in the organoleptic characteristics thereof;

3.2. they should be manufactured in accordance with guidelines on good manufacturing practice for coatings intended to come into contact with foodstuffs and using substances of “*Technical document No. 1 - List of substances to be used in the manufacture of coatings intended to come into contact with foodstuffs*” as well as aids to polymerisation as set out in Resolution AP (92) 2 on control of aids to polymerisation (technological coadjuvants) for plastics materials and articles intended to come into contact with foodstuffs or substances of relevant national regulations, and prepared, applied and cured in strict adherence to manufacturer’s specifications, according to the conditions specified;

3.3. they should not transfer their constituents to foodstuffs in quantities exceeding 10 mg/dm² of surface area of material or article (mg/dm²) (overall migration limit). However, this limit should be 60 mg of the constituents released per kg of foodstuff (mg/kg) in the following cases:

- a) articles which are containers or are comparable to containers or which can be filled, with a capacity of not less than 500 ml and not more than 10 l;
- b) articles which can be filled and for which it is impracticable to estimate the surface area in contact with foodstuffs;
- c) caps, gaskets, stoppers or other similar devices for sealing.

3.4. they should not transfer migrating components not listed in “Technical document No. 1 – List of substances to be used in the manufacture of coatings intended to come into contact with foodstuffs” which have MW < 1000 D in quantities which could endanger human health. These non listed substances of MW < 1000 D should be subjected to appropriate risk assessment taking into account dietary exposure as well as toxicological and structure activity considerations.

TECHNICAL DOCUMENT No. 1

**LIST OF SUBSTANCES TO BE USED IN THE MANUFACTURE OF
COATINGS INTENDED TO COME INTO CONTACT WITH
FOODSTUFFS**

Version No. 1 - 10.06.2004

1. CLASSIFICATION SYSTEM OF SUBSTANCES TO BE USED FOR MATERIALS AND ARTICLES INTENDED TO COME INTO CONTACT WITH FOODSTUFFS

General specifications

List 1 - Substances approved for the use of materials and articles intended to come into contact with food

1. Substances evaluated by SCF, classified in list 0-4, and used in compliance with specific migration limits or other restrictions, if any;
2. Substances evaluated and approved by the Committee of expert on materials coming into contact with food;
3. Substances approved in Partial Agreement member states or by FDA, based on an evaluation of a toxicological dossier, which meets the present SCF criteria;
4. Substances authorised as direct food additives in compliance with specific migration limits or other restrictions;
5. The substances which have been approved by Partial Agreement member states or by FDA applying scientific evaluation criteria of the time of their approval will be listed in a Temporary Appendix to List 1.

List 2 – Substances not approved for the use of materials and articles intended to come into contact with food

Substances which do not meet the criteria set for List 1 substances.

Complementary specifications

1. The substances of the Temporary Appendix should be integrated in List 1 or List 2 not later than five years after adoption of the List of substances.
2. List 1 and List 2 will be updated in principle once a year in order to take into account newly evaluated substances, new submissions by industry or substances to be deleted.

2. INTRODUCTION OF THE LISTS

2.1. The monomer lists (A + B) contain:

2.1.1. The substances for the manufacture of organic macromolecular compounds undergoing polymerisation, polycondensation, polyaddition or any other similar process.

2.1.2. The natural or synthetic macromolecular substances to be used in the manufacture of modified macromolecules, if the monomers or the other starting substances required to synthesise them are not included in the list.

2.1.3. The substances to be used to modify existing natural or synthetic macromolecular substances.

2.2. The additive lists (C + D) contain:

2.2.1. The substances which are incorporated into coatings in order to achieve a technical effect in the finished product and which are present in the finished product.

2.3. The lists do not include the salts (including double salts and acid salts) of aluminium, ammonium, calcium, iron, magnesium, potassium, sodium and zinc of the listed acids, phenols or alcohols. These salts can, however, be used as well. Chemical names containing '... acid(s), salts' appear in the lists if the free acid(s) is (are) not listed separately. In such cases the meaning of the term 'salts' is 'salts of aluminium, ammonium, calcium, iron, magnesium, potassium, sodium and zinc'.

2.4. Neither the lists include the following substances although they may be present:

2.4.1. The substances which could be present in the finished product as:

- impurities of the substances used;
- reaction intermediates;
- decomposition products;

2.4.2. The oligomers and natural or synthetic macromolecular substances as well as their mixtures, if the monomers or other starting substances required to synthesise them are included in the lists.

2.4.3. The mixture of approved substances.

2.4.4. The aids to polymerisation as set out in Resolution AP (92) 2 on control of aids to polymerisation (technological coadjuvants) for plastics materials and articles intended to come into contact with foodstuffs.

2.4.5. The colorants and most pigments and solvents.

2.5. The substances should be of good technical quality as regards the purity criteria.

3. INFORMATION AND ABBREVIATIONS

The lists contain the following information :

- PM/REF No : the EU packaging material reference number of the substance
- CAS No : the Chemical Abstracts Service Registry Number of the substance
- NAME : the chemical name of the substance or the substance group
- SCF-L : the number of the list in which the substance is classified by the Scientific Committee for food/EFSA
- RESTRICTIONS AND/OR SPECIFICATIONS : restrictions and/or specifications related to the substance
- ADI/TDI : acceptable daily intake or tolerable daily intake as defined in the reports of the Scientific Committee for food/EFSA.
- CMP : coatings for metal packaging. A sign "+" means that the substance is used in coatings for metal packaging
- HDC : heavy duty coatings. A sign "+" means that the substance is used in heavy duty coatings
- FPC : flexible packaging coatings. A sign "+" means that the substance is used in flexible packaging coatings
- (NSC : non-stick coatings. A sign "+" means that the substance is used in non-stick coatings

A number of abbreviations are used under RESTRICTIONS AND/OR SPECIFICATIONS and ADI/TDI, the meanings of which are as follows :

- ACC Acceptable
- DL detection limit of the method of analysis
- ND not detectable
- NS not specified
- SML specific migration limit in food or in food simulants
- SML(T) specific migration limit in food or in food simulants expressed as total of moiety/substance(s) indicated

4. NOTES RELATED TO THE COLUMN "RESTRICTIONS AND/OR SPECIFICATIONS"

(1)	Warning : there is a risk that the SML could be exceeded in fatty food simulants
(2)	SML(T) in this specific case means that the restriction shall not be exceeded by the sum of the migration of the following substances mentioned as PM/REF N° : 10690, 10750, 10780, 10810, 10840, 11470, 11590, 11680, 11710, 11830, 11890, 11980
(3)	SML(T) in this specific case means that the restriction shall not be exceeded by the sum of the migration of the following substances mentioned as PM/REF N° : 13620, 40320, 87040
(4)	SML(T) in this specific case means that the restriction shall not be exceeded by the sum of the migration of the following substances mentioned as PM/REF N° : 15760, 16990, 53650
(5)	SML(T) in this specific case means that the restriction shall not be exceeded by the sum of the migration of the following substances mentioned as PM/REF N° : 16993, 16996, 53820
(6)	SML(T) in this specific case means that the restriction shall not be exceeded by the sum of the migration of the following substances mentioned as PM/REF N° : 17260, 18670, 59280
(7)	SML(T) in this specific case means that the restriction shall not be exceeded by the sum of the migration of the following substances mentioned as PM/REF N° : 20020, 20080, 20110, 20140, 20170, 20890, 21010, 21100, 21130, 21190, 21280, 21340, 21460
(8)	SML(T) in this specific case means that the restriction shall not be exceeded by the sum of the migration of the following substances mentioned as PM/REF N° : 24910, 24940
(9)	SML(T) in this specific case means that the restriction shall not be exceeded by the sum of the migration of the following substances mentioned as PM/REF N° : 19540, 19960
(10)	SML(T) in this specific case means that the restriction shall not be exceeded by the sum of the migration of the following substances mentioned as PM/REF N° : 36720, 92000
(11)	SML(T) in this specific case means that the restriction shall not be exceeded by the sum of the migration of the following substances mentioned as PM/REF N° : 54730/1, 68560
(12)	SML(T) in this specific case means that the restriction shall not be exceeded by the sum of the migration of the following substances mentioned as PM/REF N° : 60400, 60480, 61440
(13)	SML(T) in this specific case means that the restriction shall not be exceeded by the sum of the migration of the following substances mentioned as PM/REF N° : 61360, 61600
(14)	SML(T) in this specific case means that the restriction shall not be exceeded by the sum of the migration of the following substances mentioned as PM/REF N° : 68690, 83650
(15)	SML(T) in this specific case means that the restriction shall not be exceeded by the sum of the migration of the following substances mentioned as PM/REF N° : 75100, 75105
(16)	SML(T) in this specific case means that the restriction shall not be exceeded by the sum of the migration of the following substances mentioned as PM/REF N° : 93120, 93280
(17)	Not for use in polymers contacting food for which simulant D is laid down in Directive 85/572/EEC
(18)	This substance may contain up to 20 % of ethyl vinyl benzene

(19)	Specifications : Minimum viscosity $100 \times 10^{-6} \text{ m}^2/\text{s}$ (= 100 centistokes) at 25 °C
(20)	Specifications : Oxirane < 8 %, iodine number < 6
(21)	Specifications : – Content of mineral hydrocarbons with carbon number less than 25 : not more than 5 % (w/w) – Viscosity not less than $11 \times 10^{-6} \text{ m}^2/\text{s}$ (= 11 centistokes) at 100 °C – Average molecular weight not less than 500
(22)	Specifications : – Content of mineral hydrocarbons with carbon number less than 25 : not more than 5 % (w/w) – Viscosity not less than $8.5 \times 10^{-6} \text{ m}^2/\text{s}$ (= 8.5 centistokes) at 100 °C – Average molecular weight not less than 480
(23)	SML(T) in this specific case means that the restriction shall not be exceeded by the sum of the migration of the following substances mentioned as PM/REF N° : 10060, 23920
(24)	SML(T) in this specific case means that the restriction shall not be exceeded by the sum of the migration of the following substances mentioned as PM/REF N° : 10599/90A, 10599/91, 10599/92A, 10599/93
(25)	SML(T) in this specific case means that the restriction shall not be exceeded by the sum of the migration of the following substances mentioned as PM/REF N° : 13720, 40850
(26)	SML(T) in this specific case means that the restriction shall not be exceeded by the sum of the migration of the following substances mentioned as PM/REF N° : 13780, 20590, 22424, 25360
(27)	SML(T) in this specific case means that the restriction shall not be exceeded by the sum of the migration of the following substances mentioned as PM/REF N° : 15700, 16600, 16630, 18640, 19110, 22420, 25208, 25210, 25240, 25573, 25574
(28)	SML(T) in this specific case means that the restriction shall not be exceeded by the sum of the migration of the following substances mentioned as PM/REF N° : 19060, 22937, 25380, 26155, 26320
(29)	SML(T) in this specific case means that the restriction shall not be exceeded by the sum of the migration of the following substances mentioned as PM/REF N° : 16150, 49235
(30)	SML(T) in this specific case means that the restriction shall not be exceeded by the sum of the migration of the following substances mentioned as PM/REF N° : 16960, 53540
(31)	SML(T) in this specific case means that the restriction shall not be exceeded by the sum of the migration of the following substances mentioned as PM/REF N° : 64300, 68680
(32)	SML(T) in this specific case means that the restriction shall not be exceeded by the sum of the migration of the following substances mentioned as PM/REF N° : 86480, 86960
